TRAINING

Research Assistant, University of Tennessee

June 2021 - Present

Supervisor: Dr. Nicholas Dygert

RESEARCH

Research on the Trace element partitioning between apatite and silicate melts

Apr 2022 – Present

• Build predictive models to calculate the partition coefficients of trace elements between apatite and silicate melts.

Research on the Eu anomalies in lunar plagioclase

Sep 2020 – Apr 2022

• Compiled published crystallization sequences and cumulate products of lunar magma ocean.

- Numerical modeling the trace element abundances of crystallized plagioclase, and tested the reasons of Eu anomalies by subsolidus reequilibration and KREEP addition.
- Proposed a post-LMO model to explain the petrogenesis of lunar anorthosites and reconcile the trace elements and isotopic evidence, as well as the overlap in ages of Mg-suite, KREEP basalt and ferroan anorthosites.

Laboratory Work and Visiting in UT Dallas

Jul 2019 - Sep 2019

• Worked in the Global Magmatic and Tectonic Research Laboratory with Dr. Robert Stern at UT Dallas on the project aims at determining the petrogenesis of all the Early Cretaceous adakites in China

Research on Petrogenesis of Early Cretaceous Adakites in Northeast China

Oct 2018 - Apr 2019

- Aimed at figuring out the controversial tectonic settings in NE China by confirming the petrogenesis of the large-scale Early Cretaceous adakitic rocks
- Compiled the temporal and spatial distribution as well as the major elements, trace elements and Sr-Nd, Lu-Hf isotopic data about the Early Cretaceous adakites
- Proposed a convergent bidirectional subduction model to explain the tectonic settings
